SECTION 4 : HAZARD IDENTIFICATION

Harmful by inhalation and in contact with skin.
Irritating to eyes, respiratory system and skin.
SECTION 5: FIRST AID MEASURES

Ingestion: Induce vomiting after drinking water. Get prompt medical attention. If patient is unconscious, DO NOT induce vomiting.

Eye Contact: Immediately flush with plenty of water for at least 15 minutes. Get medical attention.

Skin Contact: Remove contaminated clothing and wash skin thoroughly with soap and water.

Inhalation: Remove victim to fresh air. Get medical attention.

Notes to Physician:

Poisoning Symptoms: Perspiration, dizziness, headache, nausea, vomiting, blurred vision, salivation, diarrhoea, abdominal cramps, respiratory difficulties, muscular fibrillation. May cause hypersensitivity, tremor, clonic convulsion etc. (Based on the results from acute toxicity studies in rats for Tetramethrin technical)

Medical Treatment: Inject atropine sulphate (2-4 mg) subcutaneously or intravenously. Repeat every 30 minutes until patient is fully atropinised then administer pralidoxime (1g) intramuscularly, if necessary.

SECTION 6: FIRE FIGHTING MEASURES

Extinguishing Media: CO₂, dry chemical powder.

Fire Fighting Instruction: Fire fighters should wear full-faced self-contained breathing apparatus and protective clothing.

Special Hazards: No data available

SECTION 7: ACCIDENTAL RELEASE MEASURE

Leak and/or Spill:

Wear protective clothing. Eliminate ignition source. Ventilate area. Absorb spills with inert material such as clay, sand, earth, sawdust etc. and collect in a drum. Cover up the contaminated area with household detergent and small amount of water. Brush the slurry and spread inert absorbents on the slurry liquid and collect the absorbed material in a drum. Seal drum and dispose of. Do not contaminate water resources.
SECTION 8 : HANDLING AND STORAGE

Handling : Read the label before use. Wear pesticide respiratory masks, protective gloves and clothing while handling. After handling, wash thoroughly with soap and water before eating, drinking or smoking and change to clean clothing.

Storage : Keep in original container, tightly closed, in a cool dry and well-ventilated place, out of reach of children. Keep away from foodstuffs and animal feeds.

SECTION 9 : EXPOSURE CONTROL AND PERSONAL PROTECTION

Exposure Limit : With conventional household aerosol spraying or mosquito coil fumigation, the aerial levels of tetramethrin and its 1R isomer are unlikely to exceed 0.5 mg/m³.

Engineering Measures : Local exhaust ventilation

Personal Protection : Wear pesticide respiratory masks, protective gloves and clothing.

SECTION 10 : STABILITY AND REACTIVITY

Conditions to Avoid : Direct sunlight, heat and extreme temperature

Incompatible : Alkaline material

Decomposition Products : No data available

Hazardous Polymerization : No data available

Stability : Stable under normal conditions.
